

AWARD WINNERS 2002

Abstract Competition SARB Congress

Clinical investigations.

Non-reassuring fetal heart rate changes and uterine hyperactivity following combined spinal-epidural or conventional epidural analgesia during labor: the effect of intrathecal opioids.

*M Van de Velde, A Teunkens, G Sas, M Hanssens *, E Vandermeersch. KULeuven.*

Experimental investigations.

Fetal Somato-Sensory Evoked Potentials (SSEP) in the pregnant sheep under anesthesia.

*Anne Pexsters *, Marco Marcus **, Frans Bruyninckx #, Jan Deprest *, Marc Van de Velde. KULeuven.*

Best resident abstract.

Minimum local analgesic concentration (MLAC) of epidural ropivacaine and levobupivacaine combined with sufentanil in nulliparous patients in advanced labor.

*S. Loonbeek, I. Buyse, W. Stockman *, E. Vandermeersch, M. Van de Velde. KULeuven.*

Best Publication

Clinical :

Performance of the ARX-derived Auditory Evoked Potential Index as an Indicator of Anesthetic Depth.

Michel Struys (RUG)

Experimental :

The Limitations of Preload-Adjusted Maximal Power as an Index of Right Ventricular Contractility.

Patrick Wouters (KUL)

Winnaar B.Braun Award

A comparison of 0,1% and 0,2% Ropivacaine and Bupivacaine combined with morphine for postoperative patient-controlled epidural analgesia after major abdominal surgery.

Marc Senard (Ulg)

Winnaar Organon Award

Intradermal skin testing in the investigation of suspected anaphylactic reactions during anaesthesia - a retrospective survey.

Filiep Soetens, Sint-Elisabeth Hospital, Rubensstraat 166, 2300 Turnhout

Winnaars BSAR Grants

Experimental

A new model of fetal pain in the chronically instrumented pregnant sheep preparation.

M. Van de Velde (KUL)
