Experimental investigations

Repeated perineural injections of α 2-adrenergic agonist clonidine delays the development of hypersensitivity after nerve injury by decreasing local TNF- α release.

P. Lavand'homme, J.C. Eisenach
UCL

Clinical – Best resident abstract

Evaluation of a new, ultra-fast response, continuous cardiac output monitor.

H. Alex Leather, Christophe Bert, Willy-Serge M'Fam, Eugène Vandermeersch, Paul Sergeant and Patrick Wouters
