From Anesthesia to Perioperative Medicine
Our Key Role in Modern Health Care

8 November 2014

Aula Magna, Louvain-la-Neuve

Annual Meeting of the Society of Anesthesia and Resuscitation of Belgium (SARB)
Welcome

Dear colleague

From the early beginning of modern anesthesia in our country, the SARB was at your side organizing scientific meetings, supporting the education of residents, promoting research, as well as editing the “Acta Anaesthesiologica Belgica”. These challenges and our contribution to important consensus meetings inspired us to achieve our goals in patient care, education and research.

Today, your Society intends to further support you in the practice of our medical specialty.

As you know, anesthesia is broadening its scope to perioperative medicine. This may have an important impact on our daily practice. For this reason, during the months preceding our annual meeting, we will focus on the topic: what does perioperative medicine mean for a Belgian anesthesiologist today? At our annual meeting we will try to provide you with some answers to this question.

Dr. Luc Foubert   Prof. Dr. Marc De Kock
President   Vice-President
